NOTICE

With this index issue, we end publication of *The Lighter*. We would like to thank our contributors as well as our readers, whose comments and suggestions were always well received.

Agriculture Canada's tobacco research will continue, however. If you wish information on this research, please contact:

Agriculture Canada Research Station

AVIS

Le présent index est le dernier numéro de la publication *Le Briquet*. Nous désirons remercier nos collaborateurs ainsi que nos lecteurs, dont les commentaires et les suggestions ont toujours été bienvenues.

La recherche sur le tabac à Agriculture Canada continuera malgré la disparition du *Briquet*. Si vous désirez recevoir de l'information concernant la recherche sur le tabac, veuillez vous adresser à l'organisme suivant :

INTRODUCTION

The Lighter 1931-1987 – An Index brings a 1-year project to a successful conclusion.

Having worked closely with the research scientists in their search for documentation on experiments from earlier years at the station, *The Lighter* proved to be the most fruitful of resources.

With well over several hundred issues of *The Lighter* dating from 1931 through to 1987, it became increasingly clear that an index would facilitate one's search.

Given the support of Mr. John Miska, Area Coordinator/Ontario, Libraries Division, Agriculture Canada, Dr. P.W. Johnson, Director of the Delhi Research Station, and the coordinating editor of *The Lighter*, Olga Smithers, the project was given the green light.

INTRODUCTION

Le Briquet, 1931 à 1987 – Index est le fruit des efforts déployés pendant toute une année.

J'ai travaillé, en étroite collaboration avec les scientifiques, à la recherche de documents sur les expériences réalisées au tout début de la station, et *Le Briquet* s'est révélé être la meilleure source de renseignements.

Plusieurs centaines de numéros du *Briquet* ont été publiés entre 1931 et 1987, et la nécessité d'un index pour faciliter la recherche s'est précisée au fil des ans.

Après avoir reçu l'appui de M. John Miska, coordonnateur de la région de l'Ontario pour la

Upon completion of the index, I would like to thank Esther Sinnesael, the station's word-processing operator for her excellent work and dedication to the project.

Philip E. Mills
Establishment Librarian

It is hoped that this publication will be of use and interest to all tobacco researchers as well as others who are interested in the subject. Many long hours of dedicated work on the part of our librarian, Mr. Philip Mills, and our word-processing operator, Mrs. Esther Sinnesael, have gone into the preparation of this index compilation. I would like to personally thank them for their effort, as well as all the authors over the years who have contributed to the success of *The Lighter*, and without whose involvement this journal would not have been published.

P. Wade Johnson
Director, Delhi Research Station

INSTRUCTIONS TO THE USER

The page numbers in the subject and author indexes refer to a page in the main body of the index. You must skim over the index page selected and locate the subject or author in question. You will now be able to identify the volume, issue number and

Division des bibliothèques d'Agriculture Canada, du Dr P.W. Johnson, directeur de la Station de recherches de Delhi, et de la rédactrice en chef du *Briquet*, Mme Olga Smithers, le projet a reçu le feu vert.

J'aimerais profiter de l'occasion pour remercier Mme Esther Sinnesael, opératrice de traitement de texte de la station, pour son excellent travail et son dévouement.

Philip E. Mills
Bibliothécaire
Station de recherches de delhi

Nous espérons que cette publication sera utile aux scientifiques qui poursuivent des recherches sur le tabac ainsi qu'aux autres personnes qui s'intéressent à ce sujet. La préparation de cet index a exigé de nombreuses heures de travail ainsi qu'un grand dévouement de la part de notre bibliothécaire, M. Philip Mills, et de notre opératrice de traitement des textes, Mme Esther Sinnesael. Je voudrais les remercier personnellement de leur dévouement. Je désire aussi remercier sincèrement tous les auteurs d'articles publiés dans *Le Briquet*, sans lesquels ce bulletin n'aurait jamais vu le jour.

P. Wade Johnson
Directeur
Station de recherches de Delhi

the page in *The Lighter* issue where the article will be found.

The page number after the author's name or, in many cases after the article, refer to the corresponding page number in *The Lighter* issue.

A BRIEF HISTORY OF THE LIGHTER

The Lighter has been issued by the Tobacco Division, Central Experimental Farm, Ottawa, as a regular publication for almost 30 years. It was, originally, issued bimonthly and some years ago it became a quarterly publication. During this interval it was also changed from a mimeographed publication to a multigraphed one and eventually to a multilithed booklet. Although the early issues were prepared and mailed to subscribers by divisional personnel, the departmental Information Service has been responsible for multilithing and mailing for a number of years. The original issues had an ordinary typewriter paper cover and back on 8 1/2 x 11 inch. With the assistance of departmental artists there have been also many changes throughout the years in the design and illustrations of the front cover.

In spite of changes such as those already indicated, there were no changes in the nature or arrangement of its contents. It invariably included a short topical

COMMENT CONSULTER L'INDEX

Les numéros de page indiqués dans l'index des auteurs et dans l'index analytique correspondent à une page de l'index principal. Vous devez parcourir rapidement la page choisie de l'index principal et trouver le sujet ou l'auteur que vous cherchez. Vous y trouverez par la même occasion le volume, le numéro et la page du *Briquet* où se trouve l'article désiré.

Le numéro de page indiqué après le nom de l'auteur ou, dans de nombreux cas, après le titre de l'article, correspond à la page d'un numéro de la publication *Le Briquet*.

BREF HISTORIQUE

Le Briquet a été publié régulièrement par la Division du tabac de la Ferme expérimentale centrale d'Ottawa pendant près de 30 ans. À l'origine, cette publication paraissait tous les deux mois, mais, il y a quelques années, elle est devenue trimestrielle. D'abord ronéotypé (reproduit au moyen de stencils) *Le Briquet* a ensuite été imprimé sur une machine Multigraph et, plus tard, sur une Multilith. Au début, le personnel de la division s'occupait de préparer et de poster aux abonnés les premiers numéros. Cependant, depuis nombre d'années, le Service d'information du Ministère est responsable de l'impression sur

leader, several statistical tables of information provided by the Dominion Bureau of Statistics and the Department of National Revenue, Empire and Commonwealth Tobacco News, Foreign Tobacco News, The Tobacco Situation in the United States, a technical or semi-scientific article, bibliography of recent scientific publications and a list of Canadian professional tobacco personnel.

Subscribers were confined to those who had a direct or major interest in the Canadian tobacco industry. Tobacco growers, however, were not generally included on the mailing list unless they held office in a grower association, marketing board, etc. Nevertheless, they received great direct and indirect benefits from the information published in *The Lighter* because its list of subscribers included the names of some 650 distinguished organizations and individuals throughout the tobacco world. A recent survey showed that 30% of those on the mailing list were individuals (growers, etc.), 29% were government officials, research stations, etc., 17% were tobacco companies, 16% were non-tobacco companies (banks, insurance, fertiizer, etc.) 6% were libraries and 3% were newspapers and tobacco journals.

The abiding interest and expressions of appreciation from many constant subscribers through-out the years was a source of considerable pride and

machine Multilith et de l'expédition par courrier. À l'origine, la page couverture et la page arrière des premiers numéros étaient constituées d'une simple feuille à dactylographier de 8 1/2 sur 11 pouces. Au fil des ans, on a apporté de nombreuses modifications à la présentation et aux illustrations de la page couverture, grâce à l'aide des artistes du Ministère.

Malgré les modifications apportées, la nature et la présentation du contenu n'ont pas changé. Chaque numéro comptait un court article sur un sujet d'actualité, plusieurs tableaux statistiques provenant du Bureau fédéral de la statistique et du ministère du Revenu national, ainsi que les rubriques *Empire and Commonwealth Tobacco News, Foreign Tobacco News, The Tobacco Situation in the United States*, un article technique ou un article de vulgarisation, une liste des récentes publications scientifiques et des employés canadiens spécialisés dans l'étude du tabac.

Seules les personnes qui avaient un intérêt évident à l'endroit du secteur canadien du tabac pouvaient s'abonner au bulletin. En général, les producteurs de tabac ne recevaient pas la publication, à moins qu'ils ne soient membres du conseil de direction d'une association de producteurs, d'un office de commercialisation ou autre organisme semblable. Ils bénéficiaient néanmoins grandement, de façon

the abiding interest and cooperation of all those who contributed to each issue and its success throughout the years was also a great inspiration and a memorable experience. However, the publication of this booklet was never regarded as anything more than an extra-curricular service to the tobacco industry at large. The amalgamation of the Experimental Farms Service and Science Service into one integrated Research Branch has meant that divisions such as the Tobacco Division will not exist and lines of research will not be set up on a single discipline or single-crop basis. It follows, therefore, that *The Lighter* can no longer be assembled and it must be announced with regret that it has been discontinued.

N.A. MacRae
29(1) May 21, 1959

The Lighter again appeared in February 1960 after the amalgamation of the Experimental Farms Service and the Science Service. Dr. N.A. MacRae (Editor) stated:

> It is the intention of *The Lighter* to provide information of a general nature pertaining to the results of scientific research in Canada. It also hopes to provide useful information relating to the economic growth and development of the industry in Canada as well as provide new items of general interest from other tobacco producing

directe et indirecte, de l'information contenue dans *Le Briquet*, parce que la publication comptait parmi ses abonnés quelque 650 organisations et personnes éminentes du secteur du tabac. Une récente enquête a permis de déterminer que 30 % des personnes ou organisations dont le nom était inscrit sur la liste de diffusion étaient des particuliers (des producteurs par ex.), 29 % des cadres du gouvernement ou des stations de recherches, 17 % des sociétés tabacoles, 16 % d'autres sociétés (banques, compagnies d'assurance, fabricants d'engrais, etc.), 6 % des bibliothèques et 3 % des journaux et des revues traitant du tabac.

L'intérêt constant dont ont fait preuve de nombreux abonnés fidèles au cours des années et l'expression de leur gratitude ont été une source de fierté. L'intérêt et l'esprit de collaboration de ceux qui ont participé à la publication et au succès de chaque numéro au cours des années ont aussi contribué à faire de ce projet une grande source d'inspiration et une expérience mémorable. Toutefois, nous n'avons jamais considéré cette brochure comme autre chose qu'un service supplémentaire offert à l'ensemble du secteur du tabac. À la suite de la fusion du Service des fermes expérimentales et de celui des sciences, qui forment maintenant la Direction générale de la recherche, certaines divisions, dont celle du tabac, ont été

countries which may be of special interest to Canadians.

After Dr. MacRae's retirement in 1965, *The Lighter* was given over to an editorial board to manage and set policy.

NOTES SECTION

January 1934

The Lighter was a bi-monthly publication. The first supplement was printed in January 1934 as a result of a change in editorial policy – "Those portions of the journal dealing particularly with the activities of the Tobacco Service will be grouped together in the *Federal Tobacco Service Supplement.* The readers of *The Lighter* will not be bored with federal service news, the segregation of such news will leave more space for statistics, articles and news having wider appeal. At the same time there will be less need for censoring and modifying federal service news than was necessary under the previous arrangement. The supplement will be sent to only those especially interested in the federal service functions."

T.G. Major – *The Lighter* editor-in-chief has joined the staff of the Commercial Intelligence Service, Dominion Department of Trade and Commerce. Departure – July 31, 1935 – the new editor is not announced at this time.

supprimées. Désormais, les domaines de la recherche ne seront plus établis en fonction d'une discipline ou d'une culture unique. Par conséquent, il est devenu impossible de continuer à publier *Le Briquet* et l'on doit annoncer avec regret l'arrêt de sa publication.

N.A. MacRae
29 (1), le 21 mai 1959

En février 1960, après la fusion du Service des fermes expérimentales et de celui des sciences, *Le Briquet* paraissait de nouveau. Le Dr N.A. MacRae (rédacteur en chef) affirmait ce qui suit :

Le Briquet a pour objectif de procurer des renseignements généraux sur les résultats de la recherche scientifique menée au Canada. On espère aussi être en mesure de procurer des renseignements utiles sur la croissance et le développement économiques du secteur canadien du tabac, ainsi que de traiter de sujets nouveaux d'intérêt général qui nous viennent d'autres pays producteurs de tabac et qui pourraient intéresser les Canadiens.

Lors de la retraite du Dr MacRae, en 1965, un comité de rédaction a été chargé de la gestion et de l'établissement des politiques de la publication *Le Briquet.*

January 1936-April 1940

The Lighter began to be published quarterly.

Inter Nos. - This is a title N.A. MacRae gave to one of his articles which does not have any meaning as far as I can ascertain. Perhaps it stands for "international numbers" (statistics) since the article deals with a cutback of international tobacco purchases.

February 1946

E.T. McEvoy is noted as the editor-in-chief of *The Lighter*.

February 1958

E.T. McEvoy is no longer listed as being editor; N.A. MacRae is the editor.

February 1959

Announcing the discontinuation of *The Lighter* – A brief history given. N.A. MacRae. May 21, 1959. Vol. 29(1). Volume 29 has only one issue.

Fall 1965

N.A. MacRae retires as editor-in-chief of *The Lighter*. Volume 35 was the only issue released in 1965.

Fall 1966

There was only one issue for Volume 36 – *The Lighter* was not

NOTES

Janvier 1934

À l'époque, *Le Briquet* paraissait tous les deux mois. Le premier supplément a été imprimé en janvier 1934 à la suite d'un changement de la politique éditoriale. «Les articles du bulletin traitant tout particulièrement des activités du Service du tabac seront groupés dans le *Federal Tobacco Service Supplement*. Les lecteurs n'auront pas à lire les nouvelles du service fédéral, ce qui laissera plus de place aux statistiques, aux articles et aux nouvelles ayant un intérêt plus général. Ces nouvelles dispositions permettront aussi de réduire le besoin de censurer et de modifier les nouvelles du service fédéral, comme on devait le faire auparavant. Le supplément ne sera envoyé qu'aux personnes qui s'intéressent plus particulièrement aux activités du service fédéral.»

T.G. Major - Le rédacteur en chef de la publication *Le Briquet* a joint les rangs des employés du Service de renseignements commerciaux du ministère fédéral de l'Industrie et du Commerce. Celui-ci quittera son poste le 31 juillet 1935. À l'époque, on ne nomme pas de nouveau rédacteur en chef.

Janvier 1936 à avril 1940

Le Briquet devient une publication trimestrielle.

issued on a quarterly basis. See "Note to Librarians" on the inside cover of Volume 36. *The Lighter* will continue on a quarterly basis with Volume 37. Volumes 56 (1986) had three issues and 57 (1987) had two issues.

Supplements - Jan./Sept./Nov.

Inter Nos – Il s'agit du titre d'un des articles de N.A. MacRae, dont il m'est difficile de déterminer le sens. Peut-être s'agit-il d'une abréviation signifiant données à l'échelle internationale (statistiques), puisque l'article traite d'un fléchissement des achats de tabac à l'échelle internationale.

Février 1946

E.T. McEvoy est alors rédac-teur en chef.

Février 1958

C'est désormais le nom de N.A. MacRae qui est donné comme rédacteur en chef et non plus celui de E.T. McEvoy.

Février 1959

On annonce que *Le Briquet* ne sera plus publié – On fait un bref historique du briquet. N.A. MacRae. Le 21 mai 1959, vol. 29 (1). Le volume 29 n'a qu'un seul numéro.

Automne 1965

N.A. MacRae quitte le poste de rédacteur en chef. Le volume 35 (1965) ne comporte qu'un seul numéro.

Automne 1966

On ne publie qu'un numéro du volume 36 – *Le Briquet* n'est pas publié à chaque trimestre. Voir la

Aid to Zambia.
Radioactive waves probe tobacco virus. The Simcoe Reformer.
Personnel. (31).

VOL. 38 (3). Summer/été 1968

The impact of bulk curing/Où en est le séchage en vrac ? E.K. Walker. (5-6).
Progress of the Canadian tobacco crop. (7-8).
Le bilan d'eau du sol adapté à l'irrigation du tabac jaune. J. Allard. (9-14).
The effect of three fumigants on natural weed infestation in a tobacco seed bed. Dr. S.K. Gayed. (15-20).
Publication abstracts. (21-22).
Bulk vs conventional curing. E.K. Walker. (23-29).
Podzol soils require P and K fertilizers. K.E. LeLacheur. (29).
World tobacco news. (30-45).
Highlights.
Ontario crop and export target for 1968.
United States: government assisted program.
Australia. Austria. Britain. France.
Greece. Netherlands. India. Italy.
Rhodesia. South Africa. Turkey. United States. Soviet Union. West Germany.

Statistics on Canadian tobacco. (46-48).
Exports by types. Exports by country.
Production. Imports by types.
Imports, by country. Excise tax.
Post scripts. (49-50).
Marketing in the U.S., Canada and Rhodesia.
U.S. growers install bulk curers.
Tobacco personnel. (51).

VOL. 38 (4). Fall/automne 1968

Maritime tobacco expands/L'industrie du tabac progresse dans les Maritimes. (5-7).
Progress of the Canadian tobacco crop. (8-9).
Plant tissue analysis determines mineral levels in living tobacco leaves. J.M. Elliot. (10-13).
Publication abstracts. (14).
World tobacco news. (16-32).
Situation and outlook.
New Zealand tobacco industry.
World exports in 1967.
Principal exporting countries.
Canada. Belgium. European Economic Community.
Pakistan. Tanzania. United Kingdom.
United States. Zambia and Malawi.
Statistics on Canadian tobacco. (33-41).
Exports by types. Exports by countries.
Imports by types. Imports by countries.
Production. Excise tax. Total stocks.
Manufacturing. Ontario tobacco statistics.
Post scripts. (42).
Australian steps up research.
Growing tobacco in Alberta.
Tobacco personnel. (43).

VOL. 39 (1). Winter/hiver 1969

Tobacco outlook/La production du tabac au Canada - prévisions. (5-6).
Progress of the Canadian tobacco crop. (7-9).
In memorium. Frank S. Nowosad. (9).
Evaluating flue-cured tobacco varieties for black root rot tolerance. F.H. White. (10-12).
Publication abstracts. (13).
World tobacco news. (14-25).
International situation: flue-cured tobacco.
Canada revises situation and outlook.
United States situation and outlook.

Field comparison of deltamethrin, cypermethrin and permethrin on rye, soil or tobacco seedlings for control of the darksided cutworm in Ontario. H.H. Cheng and J.J. Hanlon. (24-29).
Survival of barn mold organisms on burley tobacco lathes. T.R. Anderson. (30-33).
World tobacco news. N.L. Longmuir. (34-36).
Statistics. (38-39).
Climatic conditions of tobacco growing areas - Canada. S.N. Edey. (40-41).
Postscript. (42).
Personnel.

VOL. 54 (3). Summer/été 1984

Monitoring leaf wetness at Delhi Research Station/Surveillance de l'humidité des feuilles à la Station de recherches de Delhi. S.K. Gayed and D.A. Brown. (5-8).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (9-11).
Tobacco greenhouse construction costs. (12-15).
Flue-cured tobacco seedlings: effects of seedling age, transplanting time, and seeding density on seedling growth and crop production factors. E.K. Walker. (16-21).
Influences of seed size, vermiculite cover, and watering regime on germination, survival and growth of flue-cured tobacco seedlings under glass. E.K. Walker, L.B. Reynolds and W.D. Rogers. (22-30).
Control of cryptogams in growth media used for flue-cured tobacco seedling culture. E.K. Walker and L.B. Reynolds. (36-41).
Flue-cured tobacco seedling culture in containers; tray filling and seeding. E.K. Walker and L.B. Reynolds. (36-41).
Publication summaries. (42).
World tobacco news. N.L. Longmuir. (43-44).
Leaf tobacco production and value-1983. (45).
Statistics. (46-47).
Climatic conditions in tobacco growing areas - Canada. S.N. Edey. (48-49).
Postscript. (50).
Personnel.

VOL. 54 (4). Fall/automne 1984

Effect of nitrogen on tobacco growth, development and maturity/Effets de l'azote sur la croissance, le développement et la précocité du tabac. N. Rosa. (5-11).
Progress of the Canadian tobacco crop/Le point sur la récolte de tabac au Canada. (12-14).
Publication summaries. (15).
The effect of herbicides on agronomic and chemical characteristics of flue-cured tobacco in Ontario in 1982. B.F. Zilkey and B.B. Capell. (16-20).
A survey of flue-cured tobacco grown in Ontario in 1983. Part 2: soil characteristics and nutrient elements. J.M. Elliot, R.P. Beyaert and R. Pocs. (21-24).
Culture of flue-cured tobacco seedlings in Todd cells: influence of growth media on seedling growth. E.K. Walker and L.B. Reynolds. (25-30).
World tobacco news. N.L. Longmuir. (31-33).
Statistics. (34-35).
Canada: climatic conditions of tobacco growing areas. S.N. Edey. (36-37).
Postscript. (38).
Personnel.

VOL. 55 (1). Winter/hiver 1985

Tobacco situation and outlook/Tabac : situation et perspectives. N.L. Longmuir. (5-12).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (13-16).
Flue-cured tobacco seedlings: effects of seeding density on seedling growth and crop production factors. E.K. Walker. (17-23).
Field persistence of the recommended insecticides for before planting control of cutworms on tobacco. H.H. Cheng and J.J. Hanlon. (24-28).
Monitoring tobacco leaf wetness in 1984. S.K. Gayed and D.A. Brown. (29-30).
Publication summaries. (31).
World tobacco news. N.L. Longmuir. (32-33).
Statistics. (34-35).
Climatic conditions in tobacco growing areas - Canada. S.N. Edey. (36-37).
Postscript. (38).
Personnel.

VOL. 55 (2). Spring/printemps 1985

Effect of nitrogen on tobacco growth, development and maturity - Part II: influence de l'azote sur la croissance, le développement et la précocité du tabac. Partie II. N. Rosa. (5-11).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (16-18).
Influence of different media and top-dressings in flue-cured tobacco seedbeds. L.B. Reynolds and E.K. Walker. (19-23).
Tobacco genetics and plant breeding. R.S. Pandeya. (24-28).
Cigarette smoke analysis from a farm survey of flue-cured tobacco in Ontario in 1983. B.F. Zilkey and B.B. Capell. (29-31).
World tobacco news. N.L. Longmuir. (32-33).
Statistics. (34-35).
Climatic conditions in tobacco growing areas - Canada. S.N. Edey. (36-37).
Postscript. (38).
Personnel.

VOL. 55 (3). Summer/été 1985

International honors for Delhi Research Station scientist Jim Elliot/ Distinction honorifique internationale accordée à un chercheur de la Station de recherches de Delhi, Jim Elliot. (5-7).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (8-11).
Study of the chemical composition of Quebec tobacco in 1982/Enquête sur la composition chimique du tabac au Québec en 1982. S. Payette and M. Lamarre. (12-18).
The effects of ammonium and nitrate nitrogen on yield and quality of flue-cured tobacco. W.J. Arsenault. (19-20).
Long-term storage of tobacco bales. D.A. Stier. (21-23).

A survey of flue-cured tobacco grown in Ontario in 1984. Part 1: sugars, alkaloids, nitrogen, chlorine and lamina weight. J.M. Elliot, R. Pocs, and R.P. Beyaert. (24-26).
Grey tobacco: an overview. N.P. Arnold. (27-28).
World tobacco news. N.L. Longmuir. (29-30).
Publication summaries. (31).
Statistics. (32-33).
Postscript. (34).
Personnel.

VOL. 55 (4). Fall/automne 1985

Using biotechnology to increase nicotine content and improve disease tolerance in tobacco/Accroître la nicotine du tabac et améliorer sa tolérance aux maladies par la biotechnologie. R.S. Pandeya and W.A. Keller. (5-12).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (13-15).
American flue-cured tobacco cultivars and their performance under Canadian agroclimatic conditions. R.S. Pandeya, W.D. Rogers, and J.C.D. Ankersmit. (16-20).
The effect of herbicides on agronomic and chemical characteristics of flue-cured tobacco in Ontario in 1983. B.F. Zilkey and B.B. Capell. (21-24).
A survey of flue-cured tobacco grown in Ontario in 1984. Part II: soil characteristics and nutrient elements. J.M. Elliot, R.P. Beyaert, and R. Pocs. (25-28).
Statistics. (29-31).
Climatic conditions in tobacco growing areas - Canada. S.N. Edey. (32-33).
Postscript. (34).
Personnel.

VOL. 56 (1). Winter/hiver 1986

Tobacco situation and outlook/Tabac : situation et perspectives. N.L. Longmuir. (5-10).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (11-14).
Effectiveness and field persistance of the recommended insecticides for control of cutworms on tobacco after transplanting. H.H. Cheng and J.J. Hanlon. (15-20).
Cost of tobacco seedling production, transplanting and replanting. E.K. Walker, L.B. Reynolds, and L.L. Hoy. (21-32).
Performance of Canadian flue-cured tobacco cultivars - Impact on overall quality. R.S. Pandeya, W.D. Rogers, and J.C.D. Ankersmit. (33-40).
World tobacco news. N.L. Longmuir. (41).
Statistics. (42-43).
Climatic conditions in tobacco growing areas - Canada. S.N. Eady. (44-45).
Postscript. (46).
Personnel.

VOL. 56 (2/3). Spring-summer/printemps-été 1986

Tobacco scientist dies/Décès d'un de nos chercheurs (J.M. Elliot). P.W. Johnson. (5-6).
Temperature and sucker development/Température et production des drageons. N. Rosa. (7-11).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (12-13).
A survey of flue-cured tobacco grown in Ontario in 1985. Part I: sugars, alkaloids, nitrogen, chlorine and lamina weight. J.M. Elliot, R. Pocs, and R.P. Beyaert. (14-16).
Monitoring tobacco leaf wetness in 1985. S.K. Gayed and D.A. Brown. (17-18).
Effect of formaldehyde on pole rot of flue-cured tobacco caused by Rhizopus arrhizus. S.K. Gayed and D.A. Brown. (19-22).
Cigarette smoke analysis from a farm survey of flue-cured tobacco in 1984. B.F. Zilkey and B.B. Capell. (23-25).
World tobacco news. N.L. Longmuir. (26-27).
Statistics. (28-29).
Personnel.

VOL. 56 (4). Fall/automne 1986

Field evaluation of tobacco plants produced in Todd cells under various conditions/Évaluation au champ des plantules de tabac produites en cellules de Todd sous différents traitements. Michael Lamarre. (5-17).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (18-20).
A survey of flue-cured tobacco grown in Ontario in 1985. Part 2: soil characteristics and nutrient elements. J.M. Elliot, R. Pocs, and R.P. Beyaert. (21-24).
Residue levels in cured tobacco leaves following treatment with Ridomil MZ. S.K. Gayed and D.A. Brown. (25-26).
Effect of herbicides on agronomic and chemical characteristics of flue-cured tobacco in Ontario in 1984. B.F. Zilkey and B.B. Capell. (27-31).
Publication summaries. (32-34).
World tobacco news. N.L. Longmuir. (35).
Statistics. (36-37).
Postscript. (38).
Personnel.

VOL. 57 (1/2). Winter-spring/hiver-printemps 1987

Tobacco situation and outlook/Tabac : situation et perspectives. N.L. Longmuir. (5-10).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (11-12).
Nematodes in flue-cured tobacco grown on Prince Edward Island in 1985. (13-15).

Composition chimique des sols cultivés en tabac à cigarette dans la région de Joliette. J. Kimpinski and W.J. Arsenault. (16-18).
Cost of flue-cured tobacco harvest, curing and stripping. E.K. Walker and L.B. Reynolds. (19-25).
Cigarette smoke analysis from a farm survey of flue-cured tobacco in 1985. B.F. Zilkey and B.B. Capell. (26-28).
Publication summaries. (29-31).
Statistics. (32-35).
Climatic conditions in tobacco growing areas in Canada/Conditions climatiques dans les zones de culture du tabac au Canada. S.N. Eady. (36-41).
Personnel.

VOL. 57 (3/4). Summer-fall/été-automne 1987

E. Kenneth Walker, research scientist, retires after 35 years/E. Kenneth Walker, chercheur scientifique, prend sa retraite après 35 ans. P.W. Johnson. (5-7).
Progress of the Canadian tobacco crop/Le point sur la culture du tabac au Canada. (8-14).
Alternate crops research (sweet potatoes, ginseng, evening primrose and guayule).
A survey of flue-cured tobacco grown in Ontario in 1986. Part 1: chemical and physical characteristics. W.A. Court, R. Pocs and R.P. Beyaert. (14-17).
Delliot - a flue-cured tobacco cultivar. R.S. Pandeya, W.D. Rogers and J.C.D. Ankersmit. (18-22).
The effect of herbicides on agronomic and chemical characteristics of cured tobacco in Ontario in 1985. B.F. Zilkey and B.B. Capell. (22-26).
The use of poly covers over greenhouse beds to provide protection from cold temperatures. N. Rosa. (26-30).
Root-lesion nematodes in tobacco on Prince Edward Island. J. Kimpinski, W.J. Arsenault and J.A. MacLeod. (31-33).
Publication summaries. (34-35).
Statistics/Statistiques. (35-38).
Climatic conditions in tobacco growing areas in Canada/Conditions climatiques dans les zones de culture du tabac au Canada. S.N. Eady. (39-48).
Personnel.

L'influence de la dose d'engrais et de la densité de population sur le développement des variétés de tabac à cigarette au Québec : 1. données culturales. M. Lamarre. (24-28).
Publication summaries. (29-30).
World tobacco news. Bernard Diepman. (31-42).
Statistics on Canadian tobacco. T.P. Sterling. (43-47).
Canada: climatic conditions in tobacco growing areas. S.N. Edey. (48-49).
Postscript. (50).

VOL. 45 (4). Fall/automne 1975

Saving energy in tobacco production/La crise de l'énergie et le tabac. Lois James. (5-7).
Progress of the Canadian tobacco crop. (8-9).
L'influence de la dose d'engrais et de la densité de population sur le développement des variétés de tabac à cigarette au Québec. 2. Données agronomiques. M. Lamarre. (10-13).
The significance of increased tobacco leaf polyphenols induced by a soil-borne disease. S.K. Gayed and Nestor Rosa. (14-15).
A survey of burley tobacco grown in Ontario in 1974. J.M. Elliot and W.A. Scott. (16-19).
Synthetic tobacco substitutes. (19).
World tobacco news. Bernard Diepman. (20-27).
Statistics on Canadian tobacco. T.P. Stirling. (28-31).
Canada: climatic conditions in tobacco growing areas. S.N. Edey. (32-33).
Postscript. (34).

VOL. 46 (1). Winter/hiver 1976

Outlook for tobacco in 1976/Perspectives du tabac en 1976. N.L. Longmuir. (5-6).
Progress on the Canadian tobacco crop. (7-8).
Canadian tobacco situation. N.L. Longmuir. (9-11).
L'influence de la dose d'engrais et de la densité de population sur le développement des variétés de tabac à cigarette au Québec : 3. Données chimiques. M. Lamarre. (12-15).
A survey of flue-cured tobacco grown in Ontario in 1974. Part 2. J.M. Elliot. (16-20).
Publication summaries. (21-22).
Director at Delhi retires, Lea S. Vickery. (23-25).
World tobacco news. Bernard Diepman. (26-38).
Statistics on Canadian tobacco. T.P. Sterling. (39-42).
Canada: climatic conditions in tobacco growing areas. S.N. Edey. (43-44).
Postscript. (45).

VOL. 46 (2). Spring/printemps 1976

Importance of chemistry in quality evaluation/Importance de la chimie dans l'évaluation qualitative. W.A. Court. (5-7).

Progress of the Canadian tobacco crop. (8-9).
A survey of flue-cured tobacco grown in Ontario in 1975. Part I: sugars, alkaloids, nitrogen, filling value, and lamina weight. J.M. Elliot. (10-11).
1976 registered weed control practices. G.H. Friesen. (12).
Effect of supplemental heat and ventilation during curing on agronomic and chemical characteristics of cigar tobacco. V. Kozumplik and P.P. Lukosevicius. (13-22).
1975 was a good year for N.S. tobacco farmers. Gail MacDonald. (23).
Evaluation of new variety introductions. F.H. White. (24-28).
Publication summaries. (29).
World tobacco news. Bernard Diepman. (30-35).
Statistics on Canadian tobacco. T.P. Sterling. (36-39).
Climatic conditions in tobacco growing areas - Canada. S.N. Edey. (40-41).
Postscript. (42).

VOL. 46 (3). Summer/été 1976

Tobacco genetics program at Delhi/Programme d'amélioration génétique du tabac à la Station de recherches de Delhi. R.S. Pandeya. (5-7).
Progress of the Canadian tobacco crop. (8-9).
Survey of DDT in flue-cured tobacco (1971-1974). Nestor Rosa and D.A. Shearer. (10-11).
Publication summaries. (12).
Shortening of vegetative period of cigar tobacco. V. Kozumplik. (13-15).
Mechanical tobacco harvesting in Prince Edward Island. K.E. Lelacheur. (16-17).
World tobacco news. Bernard Diepman. (18-27).
Statistics on Canadian tobacco. T.P. Sterling. (28-31).
Climatic conditions in tobacco growing areas - Canada. S.N. Edey. (32-33).
Postscript. (34).

VOL. 46 (4). Fall/automne 1976

Quality of Canadian tobacco/Qualité du tabac canadien. (5-7).
Progress on the Canadian tobacco crop. (8-9).
Topping for quality and yield. J.M. Elliot. (10-11).
Cigar tobacco air curing and bulk curing. Vinko Kozumplik. (12-16).
Soil fumigants for black root rot control. S.K. Gayed. (17-19).
U.S. outlook. (19).
Delhi director appointed/Nouveau directeur à Delhi, Dr. C. Frank Marks. (20-21).
A look at the hogshead operation at Macdonald Tobacco Inc. (22-23).
A small acreage of UK tobacco is feasible. (24-25).
World tobacco news. Bernard Diepman. (26-35).
Statistics on Canadian tobacco. T.P. Sterling. (36-39).
Climatic conditions in tobacco growing areas - Canada. S.N. Edey. (40-41).
